Medicare Advantage Partners with Cotiviti

On Sept. 1, 2022, our Medicare Advantage plans partnered with Cotiviti, a market leader in payment accuracy, for periodic reviews of paid claims. Post-payment reviews include payment data validation (PDV) mining and clinical chart validation (CCV) diagnosis-related group review.

What you see:

- PDV reviews are conducted to ensure correct reimbursement and rely on paid claim data to determine accuracy.
- CCV reviews are conducted to ensure proper billing and require medical records.

If a claim is identified for either review, you will receive a letter identifying the claim(s) selected. Details related to the guidelines and time frames will follow.

Cotiviti is an independent company that conducts audits on behalf of BlueCross BlueShield of South Carolina in accordance with current industry standards and practices.

Claims Reminders

- A claim line with revenue code 0249 is added to the claim.
 - Line will deny with CARC 216, RARC N183

Claims Reminders

Provider Reconsideration vs. Corrected Claim

Knowing when to submit a provider reconsideration versus a corrected claim is important.

Examples of when a provider reconsideration can be submitted:

Provider Reconsideration

A claim is rejected because the medical necessity could not be determined

A claim is rejected for lack of authorization, but the member was comatose when they arrived at the hospital

Examples of when a corrected claim should be submitted:

Corrected Claim

An anesthesia claim is submitted with the incorrect modifier and rejects as a duplicate

A provider only performs the Cesarean delivery, but submits their claim with the procedure 59515 (which includes postpartum care), causing the claim to process globally

Claims Reminders

Get Paid Faster! Use *FastAttach*™
Electronic Claim Attachments.

What is *FastAttach*?

FastAttach from NEA Powered by Yvne® is a compliant, HITRUST CSF Certified solution for submitting electronic claim attachments and supporting documentation required for claim adjudication. *FastAttach* eliminates manual, paper-based processes related to requests for supporting claim documentation and enhances denial tracking for dental providers. Say "goodbye" to claim processing delays and get reimbursements flowing with *FastAttach*.

Improve claim adjudication times by electronically transmitting:

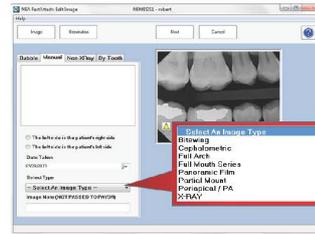

- X-rays
- Perio charts
- EOBs
- Narratives
- Pre-treatment estimates
- Secondary insurance information
- Any other documentation required to adjudicate a dental claim.

It automatically populates claim data eliminating the need for time consuming manual data entry. *FastAttach* is an encrypted, Internet based software and meets industry security requirements. Additionally, *FastAttach* interfaces with most major dental practice management systems and clearinghouses to further streamline your practice's workflow.

How does *FastAttach* work?

FastAttach is easy to setup and use. Once a request is received for additional documentation, the user simply needs to import, upload, scan or capture the image and attach it to the electronic request. *FastAttach* supports the widest variety of image acquisition

methods in the industry including: screen capture, file import, scanner and secure mobile device capture through our patented *FastKapture* app for iOS® and Android®.

Easily attach X-rays or other required supporting documentation.

Once the image is captured in *FastAttach*, the user simply transmits the image to the NEA repository. NEA immediately sends a report back to the practice with an NEA Attachment Tracking Number for each file. Understanding Care Opportunity Reports — Prospective Season

- Past medical history has been added for members ()
- Non-compliance can be a true “gap” in care or a “gap” in data ()
 - A true gap in care or non-compliance is when the member has not received the care.
 - A data gap is when the member has received the care, but this information was not shared with the plan.
 - Either way, the member will remain listed as “non-compliant” until the care is given AND that information is shared with us.
